**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The examiner does not understand what claim 9 recites. What does "said arranging means is made to prohibit to initial sheet-shaped medium of copy" mean?

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-17 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Tsutsui (JP 2001341927 A).

5. Claims 1-2, 6-15, 19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishiguro et al. (JP 2000086064 A). Ishiguro discloses a sheet-shaped medium processing

apparatus that includes a discharging means (73), a piling means (11), and arranging means (31/211) that slides in a concave portion of the piling means (see Figs. 12-13).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ishiguro et al. in view of Hoshi et al. (JP 62-8965). Ishiguro discloses all the limitations of the claim, but it does not disclose step shaped relief sections formed at the head of the arranging sections of the arranging members. However, Hoshi discloses a sheet sorting tray with step shaped relief sections (see Fig. 5) formed at the head of the arranging sections for the purpose of directing sheets toward the sheet arranging section of sheet arranging members (43a, 43b). It would have been obvious for a person of ordinary skill in the art at the time of the applicant's invention to modify Ishiguro by utilizing step shaped relief sections formed at the head of the arranging sections, as disclosed by Hoshi, for the purpose of directing sheets toward the sheet arranging section of the sheet arranging members.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
